ONEBEHALFOF™ Re...

PRIVATE MATERIAL NEVER SHIPPED

THE LOAD-BEARING DISTINCTION

“An unbound principal field is a label, not a proof.”

In RCT 1.4, onebehalfof sits inside the canonical receipt body. Change the principal and the hash changes. Change the hash and both signatures fail.

Live verifier. CANON-SIGN 2.0 and RCT 1.4 are presented as the author's draft, pending Institute ratification. No production private key is present in this site.
